6.4kg/m Galvanised Scaffold Tube for Sale

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: $5-$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Material: Galvanised Steel
- Thickness: 3.2mm
- Length: 6m
- Name: Galvanised Scaffold Tube
- Surface Treatment: Galvanised
- Weight: 6.4kg/m
- Elongation: >20%
- Yield Strength: 245N/mm2
- Highlight: **Galvanized Scaffolding Pipe**, **Metal Galvanised Scaffold Tube**

Product Description

Product Description:

Our **Galvanised Steel Scaffolding Tube** is an essential component used in the construction of scaffolds. The Galvanised Scaffold Piping is made of high-grade steel and features a galvanised finish to protect it from corrosion. It meets the EN39 Standard and has a **diameter of 48.3mm** and a **length of 6m**. This metal scaffold tube has a **yield strength of 245N/mm2**. Our Galvanised Scaffold Tube is ideal for use in any construction project, providing a strong and reliable support structure.

Technical Parameters:

Name	Specifications

Weight	6.4kg/m
Material	Galvanised Steel
Name	Galvanised Scaffold Tube
Corrosion Resistance	Excellent
Diameter	48.3mm
Tensile Strength	420N/mm2
Surface Treatment	Galvanised
Application	Scaffolding
Yield Strength	245N/mm2
Standard	EN39

Applications:

Bythai Scaffolding's Galvanised Steel Scaffold Tube (BT01) is the perfect choice for those who need a strong, reliable and high-quality scaffolding tube. It is certified by SGS, the leading global certification body, and manufactured in China. It is available at an affordable price range of $5-$18 per piece, and can be conveniently delivered in bundles within 7-15 days. The payment terms are flexible and can be made by TT/LC. The supply ability is up to 1000 tons per month. It is certified to EN39 standards and has a weight of 6.4kg/m with a thickness of 3.2mm and a diameter of 48.3mm.

Customization:

Galvanised Scaffold Tube is a type of metal scaffolding tube made of galvanised steel with excellent corrosion resistance and yield strength of 245N/mm2. It has a diameter of 48.3mm and a bending radius of >2.5D. The brand name is Bythai Scaffolding and the model number is BT01, which is certified by SGS. The price ranges from $5 to $18 per tube and the packaging is in bundles. The delivery time is 7-15 days and the payment terms are TT/LC. The supply ability is 1000tons per month.

Support and Services:

Galvanised Scaffold Tube Technical Support and Service

At [Company], we provide comprehensive technical support and service for our galvanised scaffold tube products. Our team of experienced technicians and engineers are available to help you select the most suitable product for your application. They can provide advice on installation, maintenance, and troubleshooting for all types of scaffold tube systems.
Our technical support and service also includes a range of on-site training programs. These programs are designed to help you get the most out of your scaffold tube system and ensure that it is installed and used in the correct manner. Our training programs are tailored to specific applications and include topics such as safe working practices, product selection and installation techniques.
We also offer a range of after-sales services, including regular maintenance checks and repairs. Our experienced technicians can assess the condition of your scaffold tube system and carry out any necessary repairs or replacements.

Packing and Shipping:

Galvanised Scaffold Tube Packaging and Shipping:
The tubes are typically shipped in bundles, wrapped in plastic, and strapped together. All bundles should be properly labelled with product information, including product name, size, and weight. The bundles should then be placed in containers with the lid securely closed. The containers should be clearly labelled with the product name, weight, and destination address.

FAQ:

Q: What is Galvanised Scaffold Tube?

A: Galvanised Scaffold Tube is a steel tube with zinc coating, which is used for construction works.

Q: What is the brand name of Galvanised Scaffold Tube?

A: The brand name of Galvanised Scaffold Tube is Bythai Scaffolding, with model number BT01.

Q: Where is the Galvanised Scaffold Tube from?

A: Galvanised Scaffold Tube is from China.

Q: What is the price of Galvanised Scaffold Tube?

A: The price of Galvanised Scaffold Tube is from $5 to $18.

Q: What is the certification of Galvanised Scaffold Tube?

A: The certification of Galvanised Scaffold Tube is SGS.
