EN39 Standard Galvanised Scaffold Tube With Elongation 20%

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: $5-$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Thickness: 3.2mm
- Surface Treatment: Galvanised
- Yield Strength: 245N/mm2
- Length: 6m
- Name: Galvanised Scaffold Tube
- Diameter: 48.3mm
- Standard: EN39
- Elongation: >20%
- Highlight: **EN39 Standard Scaffold Tube**, **20% Elongation Galvanised Scaffold Tube**, **3.2mm Galvanised Scaffold Tube**

Product Description

Product Description:

Galvanised Scaffold Tube is a heavy duty, durable and corrosion resistant scaffold tube ideal for both indoor and outdoor construction projects. It is made of high tensile strength steel with galvanized surface treatment. The tube is 48.3mm in diameter and has a bending radius of more than 2.5D. The tube has a tensile strength of 420N/mm2 and a yield strength of 245N/mm2. It is a perfect choice for any kind of scaffolding and is widely used in construction, engineering, and other industrial applications. It is a reliable and cost-effective solution for your scaffolding needs.

Features:

Product Name: Galvanised Scaffold Tube
Bending Radius: >2.5D
Name: Galvanised Scaffold Tube
Weight: 6.4kg/m
Yield Strength: 245N/mm2
Application: Scaffolding
Scaffolding Steel Tube
BS1139 Scaffolding Tube
EN36/BS1139 Steel Pipe

Technical Parameters:

Name	Galvanised Scaffold Tube
Surface Treatment	Galvanised
Diameter	48.3mm
Length	6m
Yield Strength	245N/mm2
Bending Radius	>2.5D
Elongation	>20%
Thickness	3.2mm
Tensile Strength	420N/mm2
Weight	6.4kg/m

Applications:

Bythai Scaffolding's galvanised scaffold tube (Model Number: BT01) is made from galvanised steel, and is certified by SGS. With an elongation of >20%, and a weight of 6.4kg/m, these tubes are 6m in length, and are perfect for any scaffolding project. The product is priced between $5 and $18, and is available in bundles. Delivery is usually completed within 7-15 days, with various payment terms such as TT/LC accepted. Bythai Scaffolding can provide up to 1000tons of galvanised scaffold tubes per month, making it an ideal choice for any construction company. These bs1139 scaffolding tubes are ideal for STK 500 pipes, GI pipes and galvanised pipes.

Support and Services:

Technical Support and Service for Galvanised Scaffold Tube

At XYZ Company, we are committed to providing our customers with the highest quality and most reliable galvanised scaffold tube products. We provide technical support and service for our customers to ensure their safety and satisfaction.
Our technical support and service includes:
Customized designs for applications
On-site installation assistance
Inspection and testing of galvanised scaffold tube
On-site maintenance and repair assistance
Troubleshooting and diagnostic support
Replacement parts and supplies
Our team of experienced and knowledgeable technicians are available to answer any questions you may have about our galvanised scaffold tube products. We strive to provide our customers with the best possible service and support.

If you need any assistance or have any questions, please do not hesitate to contact us.

Packing and Shipping:

Packaging and Shipping of Galvanised Scaffold Tube:
Galvanised Scaffold Tube is usually sent in bundles with a strong plastic or paper wrapping. The bundles are then loaded onto a pallet, which is secured with a plastic wrap. Each bundle is also secured with a steel band or plastic strapping. The pallet is then loaded onto a truck for delivery.
