EN74-1 Standard Scaffolding Coupler for High Strength Construction

Our Product Introduction

Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS
- Model Number: BM201
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 15-25
- Payment Terms: TT/TC

Product Specification

- Package: Container
- Application: Construction
- MOQ: 1000
- Material: Steel
- Color: Silver
- Surface Treatment: Galvanized
- Feature: High Strength
- Name: Scaffolding Coupler
- Highlight: **EN74-1 Construction Scaffolding Coupler**, **EN74-1 Standard Scaffolding Coupler**, **Galvanized Scaffold Swivel Coupler**

Product Description

Product Description:

Scaffolding Coupler - Product Overview

Introduction

Scaffolding Coupler is an essential product used in construction, designed to connect scaffolding pipes securely and safely. Made from high-quality Japanese steel, this product is durable and reliable, providing a strong and stable scaffolding structure for construction projects.

Material

Scaffolding Couplers are made from premium quality Japanese steel, known for its strength, toughness, and corrosion resistance. This ensures the product can withstand heavy loads and harsh weather conditions, making it suitable for various construction environments.

Package

Our Scaffolding Couplers are packaged in containers to ensure safe and convenient transportation and storage. This packaging method also allows for easy access and organization of the product on construction sites.

Standard

Scaffolding Couplers are manufactured in compliance with the EN74-1 standard, ensuring the product meets all necessary safety and quality requirements. This standard is recognized internationally, making our product suitable for use in various countries.

Application

Scaffolding Couplers are primarily used in construction projects to connect scaffolding pipes, providing a stable and secure structure for workers to perform their tasks. They are suitable for use in various construction environments, including residential, commercial, and industrial projects.

Key Features

Made from high-quality Japanese steel for durability and strength

Compliant with the EN74-1 standard for safety and quality

Packaged in containers for safe and convenient transportation and storage

Suitable for use in various construction environments

Provides a strong and stable scaffolding structure for workers to perform their tasks

Designed as manual scaffold connection tools for easy and efficient use

Conclusion

Scaffolding Couplers are an essential product for any construction project, providing a strong and stable scaffolding structure for workers to perform their tasks safely and efficiently. Made from high-quality Japanese steel and compliant with the EN74-1 standard, our product is a reliable and durable choice for construction professionals. Its convenient packaging and manual design make it a convenient and essential tool for scaffolding connections.

Applications:

Scaffolding Coupler - Universal Scaffold Clamping Tools

Brand Name: Scaffolding Coupler
Model Number: BM201
Place of Origin: China Tianjin
Certification: SGS
Price: $4.5-8.5
Packaging Details: In bundles
Delivery Time: 15-25 days
Payment Terms: TT/TC
Feature: High Strength
Material: Steel
MOQ: 1000
Package: Container
Application: Construction
Introduction

Scaffolding Coupler, also known as Universal Scaffold Clamping Tools, is an essential component in construction projects. It is designed to connect scaffolding tubes together, providing a safe and secure platform for workers to access higher levels of a building. The coupler is widely used in various construction projects such as building, bridge, tunnel, and other infrastructure works.
Features

High Strength: The scaffolding coupler is made of high-quality steel, ensuring its strength and durability.

Easy to Assemble: With its simple design, the coupler is easy to assemble and disassemble, saving time and effort for construction workers.

Durable and Stable: The coupler is designed to withstand heavy loads and harsh working conditions, providing a stable and safe working platform for workers.

Wide Range of Applications: The scaffolding coupler is suitable for various types of scaffolding systems, making it a versatile tool for different construction projects.

Fast Delivery: We understand the importance of timely construction, which is why we offer fast delivery of our products.

Competitive Price: Our scaffolding coupler is priced competitively, making it an affordable option for construction companies.
Usage and Application

The scaffolding coupler is mainly used to connect two scaffolding tubes together, forming a secure and stable structure. It is commonly used in the following scenarios:

Scaffolding System: The coupler is an essential component in scaffolding systems, providing a safe working platform for workers to access higher levels of a building.

Scaffold Beam Connectors: The coupler can also be used to connect scaffold beams, creating a sturdy structure for workers to perform tasks on.

Bridge Construction: The scaffolding coupler is widely used in bridge construction, providing a safe and stable working platform for workers to build and maintain the bridge.

Tunnel Construction: The coupler is also used in tunnel construction, providing a safe and secure platform for workers to build and maintain the tunnel.

Infrastructure Works: The scaffolding coupler is suitable for various infrastructure works such as building, roofing, and renovation projects.

Quality Assurance

Our scaffolding coupler is manufactured in accordance with the BS1139 standard, ensuring its quality and safety. It is also certified by SGS, a globally recognized certification company. We take pride in providing high-quality products to our customers, ensuring their satisfaction and trust in our brand.

Ordering and Packaging

To place an order for our scaffolding coupler, please contact us through email or phone. We require a minimum order quantity of 1000 pieces. The couplers will be packaged in bundles and delivered in containers.

Conclusion

In conclusion, the scaffolding coupler is an essential tool in construction projects, providing a safe and secure working platform for workers. With its high strength, easy assembly, and wide range of applications, it is a must-have for any construction company. We pride ourselves on providing high-quality products at a competitive price, with fast delivery to meet the needs of our customers. Choose Scaffolding Coupler for your next construction project and experience the difference in quality and efficiency.

Customization:

Scaffolding Coupler - Customizable Services

Brand Name: **Scaffolding Coupler**
Model Number: **BM201**
Place of Origin: **China Tianjin**
Certification: **SGS**
Price: **$4.5-8.5**
Packaging Details: **In bundles**
Delivery Time: **15-25 days**
Payment Terms: **TT/TC**
Color: **Silver**
Name: **Scaffolding Coupler**
Feature: **High Strength**
Package: **Container**
MOQ: **1000 pieces**
Customizable Services:

Coupler Scaffolding: We offer a wide range of coupler scaffolding options to meet your specific needs and requirements.

JIS Standard Couplings: Our couplers are manufactured according to the JIS standard, ensuring quality and compatibility.

Manual Scaffold Connection Tools: We also provide manual scaffold connection tools to assist with the installation and assembly of our scaffolding couplers.

Customized Sizes and Designs: Our scaffolding couplers can be customized in terms of size and design to fit your unique construction needs.

Logo and Branding Options: We offer the option to add your logo and branding to our scaffolding couplers for a more personalized touch.

Experience the convenience and reliability of our customizable services for your scaffolding needs. Contact us now to get started!

Packing and Shipping:

Packaging and Shipping of Scaffolding Coupler

Our Scaffolding Couplers are carefully packaged to ensure safe and secure delivery to our customers. Each coupler is individually wrapped in protective material to prevent any damage during transportation. The packaging also includes clear labeling for easy identification and handling.

We offer various shipping options to accommodate our customers' needs. Our standard shipping method is through reputable courier services, such as FedEx or DHL, for fast and reliable delivery. We also offer air and sea freight options for larger orders or international shipments.

Depending on the quantity and destination of your order, we will provide you with a shipping quote and estimated delivery time. We strive to ensure timely delivery and will work with our shipping partners to ensure your order arrives on time.

We take great care in packaging and shipping our Scaffolding Couplers to ensure they arrive in perfect condition, ready for use. Please contact us for any special packaging or shipping requests, and we will do our best to accommodate your needs.
