Steel Scaffolding Coupler For Silver Architecture Projects Scaffolding Pipe Coupler

Our Product Introduction

Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS
- Model Number: BM201
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 15-25
- Payment Terms: TT/TC

Product Specification

- Color: Silver
- Surface Treatment: Galvanized
- Material: Steel
- Standard: EN74-1
- MOQ: 1000
- Package: Container
- Name: Scaffolding Coupler
- Application: Construction
- Highlight: **Architecture Steel Scaffolding Coupler**, **Silver Steel Scaffolding Coupler**

Product Description:

Scaffolding Coupler: A Key Component for Safe and Strong Scaffolding

The Scaffolding Coupler is a vital component in scaffolding systems, providing a strong and secure connection between scaffolding tubes. With its high strength and reliable performance, this product is a must-have for any scaffolding project.
Product Overview

The Scaffolding Coupler, also known as a scaffold joint clamp, is designed to connect two scaffolding tubes at right angles, forming a stable and safe structure. It is an essential part of the scaffolding system, providing support and stability for workers and construction materials.
Key Features

High Strength: Made from high-quality steel, the Scaffolding Coupler has a strong and durable structure, capable of withstanding heavy loads and harsh working conditions.

Galvanized Surface Treatment: The coupler is treated with a galvanized coating, making it resistant to corrosion and ensuring a longer lifespan.

Compliant with EN74-1 Standard: This product meets the requirements of the EN74-1 standard, ensuring its safety, quality, and compatibility with other scaffold accessories.

Silver Color: The coupler comes in a silver color, making it easily identifiable and compatible with all types of scaffolding systems.
Applications

The Scaffolding Coupler is widely used in various construction projects, including building construction, bridge construction, and maintenance work. It is suitable for both residential and commercial projects, providing a safe and reliable solution for scaffolding needs.
Why Choose Scaffolding Coupler?

Secure and Stable Connection: The coupler ensures a tight and secure connection between scaffolding tubes, minimizing the risk of accidents and collapses.

Easy to Install: With its simple design, the coupler can be easily installed and removed, saving time and effort during construction.

Cost-Effective: The high strength and durability of the coupler make it a cost-effective solution for scaffolding needs, reducing the need for frequent replacements.

Compatible with BS EN 74 Scaffold Accessories: The coupler is compatible with other BS EN 74 scaffold accessories, allowing for versatile and customizable scaffolding systems.

Overall, the Scaffolding Coupler is an essential product for any scaffolding project, providing a safe, strong, and reliable connection between scaffolding tubes. Choose the Scaffolding Coupler for your next construction project and ensure the safety of your workers and the success of your project.

Technical Parameters:

Attribute	Value
Standard	EN74-1
Color	Silver
Material	Steel
MOQ	1000
Feature	High Strength
Surface Treatment	Galvanized
Package	Container
Application	Construction
Name	Scaffolding Coupler
Keywords	Universal Scaffold Clamping Tools, High-Quality Japanese Scaffold Accessories

Applications:

Scaffolding Coupler - High-Quality Scaffold Accessories

Scaffolding Coupler, also known as Scaffold Clamp, is an essential scaffold accessory used for connecting various scaffolding parts and platforms. It plays a crucial role in ensuring safety and stability on construction sites, making it a must-have tool for any scaffolding project.

At Scaffolding Coupler, we are committed to providing high-quality scaffold accessories to our customers. Our BM201 model is one of our best-selling products, trusted by construction companies worldwide.
Product Specifications

Brand Name: Scaffolding Coupler

Model Number: BM201

Place of Origin: China, Tianjin
Certification: SGS
Price: $4.5-$8.5
Packaging Details: In bundles
Delivery Time: 15-25 days
Payment Terms: TT/TC
Surface Treatment: Galvanized
MOQ: 1000 pieces
Color: Silver
Standard: BS EN 74-1
Package: Container
Application and Scenarios

Scaffolding Coupler is widely used in various construction projects, including building, bridge, and tunnel construction. It is suitable for both indoor and outdoor use and can be used in different weather conditions.
Some common scenarios where our Scaffolding Coupler is used include:
Building Construction: Scaffolding Coupler is essential for building construction as it helps connect scaffolding frames, tubes, and boards to create a secure and stable working platform for workers.
Bridge Construction: Our Scaffolding Coupler is also ideal for bridge construction, where workers need to access different parts of the bridge at various heights. It ensures the safety and stability of the scaffolding structure, allowing workers to complete their tasks efficiently.
Tunnel Construction: During tunnel construction, workers need to access different levels of the tunnel to complete their tasks. Scaffolding Coupler helps connect scaffolding frames and platforms, providing a safe and stable working environment for workers.
Why Choose Scaffolding Coupler?

Here are some reasons why our Scaffolding Coupler is the top choice for construction companies:
High-Quality Japanese Scaffold Accessories: Our Scaffolding Coupler is made with high-quality materials and follows strict quality control standards. It is designed to withstand heavy loads and harsh weather conditions, ensuring its durability and reliability.
Manual Scaffold Connection Tools: Our Scaffolding Coupler does not require any special tools or equipment for installation. It can be easily connected and disconnected manually, saving time and labor costs.
BS EN 74 Scaffold Accessories: Our Scaffolding Coupler meets the standards of BS EN 74, ensuring its safety and quality. It is also compatible with other BS EN 74 scaffold accessories, making it a versatile and cost-effective choice.
Get Your Scaffolding Coupler Today!

Don't compromise on safety and quality when it comes to your scaffolding project. Choose Scaffolding Coupler for high-quality scaffold accessories that you can trust. Contact us today to place your order and experience the difference!

Packing and Shipping:

Packaging and Shipping of Scaffolding Coupler

The Scaffolding Coupler will be packaged in a strong and durable cardboard box to ensure safe transportation. The packaging will also include foam padding and bubble wrap to provide extra protection during shipping.
The box will be labeled with the product name, quantity, and any necessary handling instructions. It will also include a barcode for easy tracking and identification.
For bulk orders, the Scaffolding Couplers will be packed into sturdy wooden crates and secured with straps to prevent any damage during transit.
The shipping method will depend on the customer's preference and location. We offer both sea and air freight options to ensure timely delivery of the product.
For international shipments, we will handle all necessary customs and documentation procedures to ensure a smooth and hassle-free

delivery process.
Customer satisfaction is our top priority, and we take great care to ensure that our products are delivered to our customers in perfect condition.
