

Silver Steel Scaffolding Coupler Coupler For Heavy Duty Construction

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS
- Model Number: BM201
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 15-25
- Payment Terms: TT/TC

Product Specification

- Standard: EN74-1
- Package: Container
- Feature: High Strength
- Material: Steel
- Application: Construction
- Name: Scaffolding Coupler
- Color: Silver
- Surface Treatment: Galvanized

Product Description:

Scaffolding Coupler

The Scaffolding Coupler is a high-strength and durable manual scaffold connection tool designed and manufactured by British Coupler Manufacturers. It is an essential component of coupler scaffolding, providing a safe and reliable way to connect different parts of scaffolding structures.

The Scaffolding Coupler is designed to be versatile and can be used in a variety of construction projects. It is suitable for both indoor and outdoor use and can be used on different types of scaffolding, such as single scaffolding, double scaffolding, and cantilever scaffolding. It is an essential tool for any construction project that requires scaffolding structures.

The Scaffolding Coupler comes in a standard size, making it compatible with most scaffolding systems. It is easy to install and can be adjusted to fit different sizes of scaffolding pipes. This feature makes it a convenient and time-saving tool for construction workers.

Package: The Scaffolding Coupler is packaged in a containerized packaging, ensuring that it is well-protected during transportation and storage. This packaging also makes it easy to transport and store the couplers, saving time and effort.

Feature: The Scaffolding Coupler is known for its high-strength and durability. It is made of high-quality materials that can withstand heavy loads and harsh weather conditions. This feature ensures that the scaffolding structures remain stable and safe for workers to use.

Color: The Scaffolding Coupler comes in a silver color, giving it a clean and professional look. This color is also easy to spot on construction sites, making it easy to locate and use.

MOQ: The Scaffolding Coupler has a minimum order quantity (MOQ) of 1000 units. This ensures that there is a sufficient supply of couplers for large construction projects, and customers can purchase in bulk at a competitive price.

The Scaffolding Coupler is a must-have tool for any construction project that requires scaffolding structures. Its high-strength, durability, corrosion resistance, and easy installation make it an essential component for safe and efficient construction work. With its adjustable and standard size, containerized packaging, and silver color, the Scaffolding Coupler is a reliable and cost-effective choice for any construction site.

Technical Parameters:

| Attribute | Value |
|--------------------------------|---------------------|
| Name | Scaffolding Coupler |
| Application | Construction |
| Material | Steel |
| Standard | EN74-1 |
| Color | Silver |
| Surface Treatment | Galvanized |
| Package | Container |
| MOQ | 1000 |
| Feature | High Strength |
| BS1139 Standard Couplings | Yes |
| Japanese Steel Pipe Connectors | Yes |
| Scaffold Beam Connectors | Yes |

Applications:

Scaffolding Coupler - The Essential Building Component

Product Description

Scaffolding Coupler, also known as British Scaffold Tube Clamps, is a crucial component in the construction and building industry. It is used to connect scaffolding tubes and create a secure and stable structure for workers to perform tasks at elevated heights. Our coupler,

model number BM201, is made from high strength galvanized steel, making it durable and able to withstand heavy loads. It meets the BS EN 74 Scaffold Accessories standard, ensuring its quality and reliability.

Application and Usage

Scaffolding Coupler is widely used in the construction and building of various structures such as skyscrapers, bridges, and houses. It is an essential tool for workers to safely and efficiently perform tasks at elevated heights. Our coupler is suitable for use in both commercial and residential projects, making it a versatile and valuable product in the industry.

Features and Benefits

- Made from high strength galvanized steel for durability and reliability
 - Meets the BS EN 74 Scaffold Accessories standard
 - Suitable for use in commercial and residential projects
 - Creates a secure and stable structure for workers to perform tasks at elevated heights
 - Easy to install and remove
 - Cost-effective solution for scaffolding needs
 - Available in silver color
 - Compatible with other scaffolding fittings and components
