

## Hot Dip Galvanized Steel Plank Scaffold for Building Construction

### Our Product Introduction

for more products please visit us on [bythaiscaffold.com](http://bythaiscaffold.com)

#### Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Model Number: BM205
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: container, shipping

#### Product Specification

- Packaging: Container
- Length: Customized
- Place Of Shipment: China
- Usage: Scaffolding
- Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic
- Material: Steel

## Product Description

### Product Description:

Scaffolding Plank

Our scaffolding plank is a heavy-duty and durable steel plank designed specifically for construction and building projects. Made from high-quality steel, our plank offers superior strength and stability, making it the perfect choice for all your scaffolding needs.

Material: Steel

Our scaffolding plank is made of high-quality steel, ensuring its strength and durability. This makes it a reliable and long-lasting choice for your construction projects.

Length: Customized

We understand that every construction project is unique and may require specific lengths of scaffolding plank. That's why we offer customized lengths to meet your individual needs and requirements.

Place of Shipment: China

All our scaffolding planks are manufactured and shipped from our factory in China. This allows us to offer competitive prices without compromising on quality.

Usage: Scaffolding

Our scaffolding plank is specifically designed for use in scaffolding systems. It provides a safe and stable platform for workers to perform their tasks at various heights in construction and building projects.

Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic

We offer three surface options for our scaffolding plank - pre-galvanized, hot dip galvanized, and spray plastic. These surface treatments not only enhance its appearance but also provide added protection against corrosion and rust, ensuring a longer lifespan for the plank.

Key Features:

High-quality steel material

Customized lengths available

Manufactured and shipped from China

Suitable for scaffolding systems

Available in pre-galvanized, hot dip galvanized, and spray plastic surface options

Strong, stable, and durable

Choose our scaffolding plank for your construction projects and experience the difference in quality and performance. Contact us today for more information and get a quote for your customized length requirements!

### Technical Parameters:

<b>Product Name</b>	Scaffolding Plank
<b>Packaging</b>	Container
<b>Material</b>	Steel
<b>Surface</b>	Pre-galvanized/hot Dip Galvanized/Spray Plastic
<b>Usage</b>	Scaffolding
<b>Length</b>	Customized
<b>Place of Shipment</b>	China
<b>Key Features</b>	Steel plank, Steel planks w/hook, Pierced steel planking

### Applications:

Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic

Usage: Scaffolding

Scaffolding Plank is a product manufactured by Bythai, a leading company in China. It is a high quality steel plank designed for use in scaffolding systems. The product is made with the finest materials and is built to withstand heavy loads and extreme weather conditions. The steel plank 230 is one of the most popular products in our range, with a thickness of 2.3mm and a width of 230mm, making it suitable for most scaffolding systems. The plank is designed to be lightweight, yet strong and durable, making it easy to handle and transport. The scaffolding steel walking planks hook is a unique feature of our product. This hook allows for easy and secure installation onto the scaffolding frame, ensuring the safety of workers while working at heights. The hook also makes it easy to dismantle and reassemble the scaffolding system when needed.

The steel frame for decking plank is another important component of our product. This frame provides additional support and stability to the plank, making it suitable for heavy-duty tasks and ensuring the safety of workers. The frame also adds durability to the product, ensuring a longer lifespan.

Our scaffolding board is designed to meet the highest safety standards, making it a reliable and trustworthy product for all construction needs. The board is made with high-quality steel and is tested for strength and durability to ensure maximum safety for workers. The steel scaffolding planks are available in various lengths, which can be customized according to the specific requirements of the project. This makes our product suitable for a wide range of construction projects, from small-scale renovations to large-scale commercial buildings.

Bythai's Scaffolding Plank is also known for its superior packaging. Each plank is bundled together for easy handling and transportation. The packaging is designed to protect the planks from any damage during shipping, ensuring that they arrive at the construction site in

perfect condition.

Our product is shipped from China, and we offer flexible payment terms such as container and shipping, making it convenient for our customers to place their orders. With a minimum order quantity of 1000, we ensure that our customers receive the best value for their money.

In addition to the standard pre-galvanized surface, we also offer hot dip galvanized and spray plastic options for our scaffolding planks. This ensures that our product is suitable for use in all weather conditions, providing maximum protection against rust and corrosion. The main usage of our scaffolding plank is in scaffolding systems, where it is used as a platform for workers to stand on while working at heights. It is also suitable for use as a walkway or decking plank in construction projects. With its high load-bearing capacity and secure installation, our product ensures the safety and efficiency of workers on the construction site.

In conclusion, Bythai's Scaffolding Plank is a reliable and top-quality product suitable for various construction projects. Its strength, durability, and safety features make it the perfect choice for all your scaffolding needs. Contact us today to place your order and experience the quality of our product for yourself!

### Packing and Shipping:

Scaffolding Plank Packaging and Shipping

Our Scaffolding Planks are carefully packaged to ensure safe delivery to our customers. Each plank is individually wrapped and placed in a sturdy cardboard box for protection during shipping.

In order to reduce the risk of damage during transportation, we use high-quality packaging materials and conduct thorough quality control checks before each shipment.

For larger orders, our planks are palletized and shrink-wrapped to prevent movement and potential damage during transit. Our team of experts carefully loads the pallets onto trucks, ensuring they are secure and ready for delivery.

We offer various shipping options to meet our customers' needs, including air, sea, and land transportation. Our dedicated logistics team works closely with trusted carriers to ensure timely and efficient delivery of our Scaffolding Planks to any location around the world.

Upon arrival, our customers can expect to receive well-packaged and undamaged Scaffolding Planks ready for immediate use.

Thank you for choosing our Scaffolding Planks. We are committed to providing the highest quality products and services to our valued customers.
