

## Safety Container Aluminum Scaffolding Plank In Various Sizes

Our Product Introduction

for more products please visit us on [bythaiscaffold.com](http://bythaiscaffold.com)

### Basic Information

- Place of Origin: China
- Brand Name: bythai
- Certification: SGS
- Model Number: BS204
- Minimum Order Quantity: 100
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 10-15
- Payment Terms: TT/TC

### Product Specification

- Type: Planks
- Size: Various Sizes Available
- Application: Scaffolding System
- Standard: EN12810, AS/NZS 1576, ANSI/SSFI SC100-5/05, BS1139
- Usage: Construction, Maintenance, Repair
- Oem: Available
- Packing: Container
- Highlight: **Container Aluminum Scaffolding Plank, EN12810 Aluminum Scaffolding Plank, BS1139 Aluminium Scaffold Boards**

## Safe And Durable Safety Design Container In Various Sizes Aluminum Scaffolding Plank

### Product Description:

The Aluminum planks is a high-performance scaffolding solution that is designed to meet the demands of the construction industry. It is an innovative and versatile product that is suitable for a wide range of applications.

Standard

The Aluminum planks complies with the following standards:

EN12810

AS/NZS 1576

ANSI/SSFI SC100-5/05

BS1139

Features

The key features of the Aluminum Ringlock System include:

**High Strength:** The system is made from high-quality aluminum material, making it strong and durable.

**Easy To Assemble:** The system is designed for easy and quick assembly, making it suitable for time-sensitive projects.

**Versatile:** The system is multi-purpose and can be used for a variety of applications, making it a cost-effective solution.

**Durable:** The aluminum material used in the system is highly durable and can withstand harsh weather conditions.

**Corrosion Resistant:** The system is resistant to corrosion, making it suitable for use in outdoor and industrial environments.

**Lightweight:** The aluminum material used in the system is lightweight, making it easy to transport and handle.

**Cost-effective:** The Aluminum Ringlock System is a cost-effective solution for construction and maintenance projects.

**Flexible:** The system is highly flexible and can be used for both small and large-scale projects.

**Safe:** The system is designed with safety in mind and meets all safety standards.

**Stable:** The system is stable and provides a secure working platform for workers.

**Efficient:** The system is designed to increase efficiency and productivity on construction sites.

**Environmentally Friendly:** The Aluminum Ringlock System is an environmentally friendly solution as it can be reused and recycled.

**Interchangeable:** The system components are interchangeable, making it easy to customize and adapt to different project requirements.

**Adjustable:** The system is adjustable, allowing for easy installation on uneven surfaces.

**Multi-functional:** The Aluminum planks can be used for various purposes such as construction, maintenance, and repair work.

Usage

The Aluminum planks is a modular and customizable scaffolding solution that offers superior quality and advanced technology. It is a cost-effective, safe, and efficient option for construction, maintenance, and repair projects. With its high strength, versatility, and durability, the Aluminum Ringlock System is the ideal choice for all your scaffolding needs.

### Technical Parameters:

Attribute	Value
Size	Various Sizes Available
Standard	EN12810, AS/NZS 1576, ANSI/SSFI SC100-5/05, BS1139
Packing	Container
Application	Scaffolding System
Origin	China
Features	High Strength, Easy To Assemble, Versatile, Durable, Corrosion Resistant, Lightweight, Cost-effective, Flexible, Safe, Stable, Efficient, Environmentally Friendly, Interchangeable, Adjustable, Multi-functional
Material	Aluminum
Type	planks
OEM	Available
Usage	Construction, Maintenance, Repair

Keyword	Description
Construction safety	Designed to ensure safe and secure construction work
Lightweight plank	Made with lightweight aluminum for easy transportation and assembly
Safety design	Incorporates safety features to prevent accidents and injuries
Convenient transportation	Packed in containers for convenient transportation to different locations
High efficiency	Efficient and time-saving assembly process for increased productivity

**Applications:**

Aluminum planks- bythai

Product Description

The Aluminum planks, model BS204, is a high-performance scaffolding system designed and manufactured by bythai in China. It is certified by SGS and meets international standards such as EN12810, AS/NZS 1576, ANSI/SSFI SC100-5/05, and BS1139. This versatile system is suitable for various sizes and applications, making it the perfect choice for construction, maintenance, and repair projects.

Key Features

- Strong and durable aluminum material
- Easy installation with minimal tools required
- Efficient and safe for construction workers
- Versatile for various sizes and applications
- Compliant with international standards
- Plank accessories for added convenience

Product Specifications

Brand Name	bythai
Model Number	BS204
Place of Origin	China
Certification	SGS
Minimum Order Quantity	100
Price	4.5-8.5
Packaging Details	Container
Delivery Time	10-15
Payment Terms	TT/TC
Standard	EN12810, AS/NZS 1576, ANSI/SSFI SC100-5/05, BS1139
Size	Various Sizes Available
Origin	China
Packing	Container
Usage	Construction, Maintenance, Repair

bythai - providing high-quality scaffolding solutions since 2005

### **Customization:**

#### **Features:**

**Safety Design:** Our Aluminum Ringlock System is designed to ensure construction safety and prevent accidents.

**High Strength:** Made of high-quality aluminum material, our system is strong and can withstand heavy loads.

**Easy To Assemble:** With a simple and efficient design, our system can be easily assembled and disassembled, saving time and labor costs.

**Versatile:** Our system can be used for various types of construction projects, making it a versatile choice for contractors.

**Durable:** The aluminum material used in our system is corrosion-resistant and can withstand harsh weather conditions, making it long-lasting and cost-effective.

**Lightweight:** Compared to traditional scaffolding systems, our aluminum ringlock system is lightweight, making it easier to transport and install.

**Cost-effective:** Our system is competitively priced and designed to help contractors save on construction costs.

**Flexible:** The interchangeable components of our system allow for flexibility in design and can adapt to different construction needs.

**Safe:** Our Aluminum Ringlock System is designed to meet safety standards and ensure the safety of workers.

**Stable:** The sturdy design of our system provides stability and support for workers and materials.

**Efficient:** With its easy assembly and versatile design, our system can improve construction efficiency and productivity.

**Environmentally Friendly:** Made of recyclable aluminum material, our system is environmentally friendly and sustainable.

**Interchangeable:** The components of our system can be easily interchanged and used for different purposes, providing flexibility and convenience for contractors.

**Adjustable:** Our system can be adjusted to fit different construction heights and requirements, providing versatility in design.

**Multi-functional:** Our Aluminum Ringlock System can be used for various types of construction projects, making it a multi-functional choice for contractors.

## Packing and Shipping:

### Packaging and Shipping

The Aluminum Ringlock System is packaged and shipped in a secure and efficient manner to ensure the safe arrival of the product to its final destination.

#### Packaging:

The components of the Aluminum Ringlock System are carefully packed in strong and durable wooden crates or cartons.

Each crate or carton is labeled with the product name, quantity, and any necessary handling instructions.

Special packaging can be arranged upon request.
