

Ring Lock Scaffolding Q235 Steel Scaffolding Ring Ringlock System Scaffolding

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM202
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Warranty: 2 Years
- Material: Q235 Steel
- Product Name: Ringlock System
- Shipping Origin: China
- Application Scenarios: Architecture
- Surface Treatment: Hot-dip Galvanized
- Highlight: **Q235 Steel Ring Lock Scaffolding, Architecture Ring Lock Scaffolding, Q235 Steel Scaffolding Ringlock System**

Product Description

Product Description:

The Ringlock System Scaffolding is a revolutionary product that has been designed to meet the needs of modern architecture construction. Made from high quality Q235 steel, this scaffolding is durable, reliable and has a high load capacity. It is the perfect solution for any construction project that requires a strong and stable support system.

Product Overview

Application Scenarios

The Ringlock System Scaffolding is suitable for a wide range of construction projects, especially in architecture. It can be used for building construction, renovation, maintenance, and more. Its flexibility and versatility make it ideal for both indoor and outdoor use.

Cost-effective Solution

The Ringlock System Scaffolding is a cost-effective solution for construction projects. Its high load capacity means that fewer components are needed, reducing the overall cost. It is also durable and long-lasting, making it a wise investment for any construction company.

Warranty and Shipping

We stand behind the quality of our product and offer a 2-year warranty for the Ringlock System Scaffolding. It is also important to note that our product is shipped directly from China, ensuring its authenticity and quality.

Safe and Reliable

The Ringlock System Scaffolding is designed with safety in mind. Its unique ring lock mechanism provides a secure and stable connection, reducing the risk of accidents. It is also designed to withstand harsh weather conditions, making it a reliable choice for any construction project.

Features:

Ringlock System Scaffolding

Product Name: Ringlock System

Material: Q235 Steel

Surface Treatment: Hot-dip Galvanized

Shipping origin: China

Application scenarios: Architecture

Key Features:

Easy to assemble and disassemble, saving time and labor costs

Strong and durable, capable of supporting heavy loads

Flexible and adjustable, suitable for various construction needs

Highly stable and safe, with anti-slip surfaces and secure connections

Hot-dip galvanized for rust and corrosion resistance, ensuring a longer lifespan

Made of high-quality Q235 steel for strength and reliability

Compatible with other scaffolding systems for added versatility

Commonly Used in:

Construction of buildings, bridges, and other structures

Maintenance and repair work

Renovation and remodeling projects

Industrial and commercial applications

Ringlock Scaffold Supplier: We are a leading supplier of high-quality ringlock scaffolding products, offering competitive prices and excellent customer service.

Ringlock Scaffold Connector: Our ringlock connectors are made of top-grade materials and are designed to provide a strong and secure connection for your scaffolding system.

Technical Parameters:

Product Name	Ringlock System
Warranty	2 Years
Surface Treatment	Hot-dip Galvanized
Material	Q235 Steel
Shipping Origin	China
Application Scenarios	Architecture

Key Features	Description
Scaffold Coupler System	Utilizes couplers to connect vertical and horizontal elements, providing a strong and stable structure.
Steel Ringlock Scaffolding	Consists of vertical standards, horizontal ledgers, diagonal braces, and steel planks, offering high load-bearing capacity and versatility in construction.

Ringlock Rosette	Unique rosette design allows for multiple connection points, increasing the flexibility and adaptability of the scaffold system.
Ledger	Horizontal element that connects two vertical standards, providing additional support and stability to the scaffold structure.
Diagonal Brace	Diagonal element that connects two vertical standards, strengthening the scaffold and preventing lateral movement.
Steel Plank	Used as a working platform, providing a safe and sturdy surface for workers to stand on during construction.

Packing and Shipping:

Ringlock System Scaffolding Packaging and Shipping

Packaging:

The Ringlock System Scaffolding is packaged in strong and durable wooden crates to ensure safe transportation and storage. The crates are designed to protect the scaffolding components from damage during transit and handling. The scaffolding components are securely packed and organized in the crates, making it easy to identify and access them during installation. The crates are also labeled with clear and detailed instructions for easy assembly.

Shipping:

The Ringlock System Scaffolding is shipped using reliable and efficient transportation methods, such as sea or air freight, to ensure timely delivery to our customers.

Our team carefully schedules and coordinates the shipping of the scaffolding to ensure that it arrives at the designated destination in perfect condition.

We also provide tracking information for our customers to easily monitor the progress of their shipment.
