Adjustable Steel Prop Heavy Duty HDG Steel Support for Construction Container Packed

Our Product Introduction

Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding steel prop
- Certification: SGS,ISO
- Model Number: BT206
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 10-25
- Payment Terms: 10-15

Product Specification

- Surface Treatment: HDG
- Weight: Heavy
- Height: Adjustable
- Function: Support
- Material: Steel
- Feature: Durable
- Usage: Construction
- Packaging: Container

Product Description

Product Description:

The Adjustable Steel Prop is a fundamental component in the construction industry, renowned for its durability and versatility. Designed to support a variety of structures and building works, this prop is an essential tool for ensuring stability and safety in construction environments. The Adjustable Steel Prop is crafted from high-grade steel, which not only contributes to its long-lasting performance but also ensures that it can withstand the rigorous demands of construction sites.

This steel prop is uniquely engineered to cater to a wide range of height requirements, thanks to its adjustable nature. The telescopic design allows for precise height modification, making it suitable for various applications, such as supporting formwork, floors, and temporary beams. The height adjustability also means that the prop can be reused across different projects, offering a cost-effective solution for construction companies.

The color of the Adjustable Steel Prop is a standard industrial silver, which gives it a professional look while also making it easy to identify on site amongst other equipment. The silver coating is not just for aesthetics; it also provides an extra layer of protection against corrosion, ensuring that the prop maintains its integrity and performance throughout its lifespan.

When it comes to weight, the Adjustable Steel Prop is on the heavier side, which is a testament to its sturdy construction and ability to support significant loads. The weight contributes to the prop's stability, ensuring that it remains firmly in place once set up. This heaviness, however, does not compromise its ease of handling and transportation, as the prop can be dismantled into smaller components when needed.

Technical Parameters:

Attribute	Details
Height	Adjustable
Material	Steel
Packaging	Container
Weight	Heavy
Surface Treatment	HDG (Hot Dip Galvanized)
Function	Support
Usage	Construction
Color	Silver
Size	Standard
Feature	Durable
Additional	Scaffolding steel prop tripod

Packing and Shipping:

The Adjustable Steel Prop will be securely packaged in a heavy-duty corrugated box to ensure the product remains undamaged during transit. The box will be sealed tightly and labeled with handling instructions to ensure that the product is transported upright at all times. For shipping, the packaged Adjustable Steel Prop will be placed on a sturdy wooden pallet, and each box will be strapped down to prevent

movement. The pallet will be shrink-wrapped for further stabilization and protection against the elements. A packing slip with the product details and quantity will be attached to the outside of the package for easy identification upon receipt. The shipment will be dispatched via a reliable freight carrier to ensure timely and safe delivery to the destination.
